1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 13-18, drawn to a partition system with a spring clip for attaching components.
 - II. Claims 19-26, drawn to a partition system with corner blocks.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility such as use in a partition system without the other invention. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the complete search required for each Group is not required for the other Group, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim
